

Cystic Fibrosis Foundation

Stance on Human Embryonic Stem Cell Research

<https://www.cff.org/stem-cells-cystic-fibrosis-therapy>

- From this page on their website, it appears that they use iPSCs and Airway stem cells for Cystic Fibrosis research. There is no mention of human embryonic stem cells.

<https://www.cff.org/researchers/epithelial-stem-cell-consortium#focus>

- On their Epithelial Stem Cell Consortium page, CFF notes that “The Foundation only funds research using adult stem cells.”

Stance on Contraception

<https://www.cff.org/managing-cf/family-planning>

- Under their “Family Planning” section on their website, CFF explicitly promotes all kinds of contraception, assisted reproduction (IVF), and surrogacy.
- However, their article on adoption seems to discourage those with CFF not to adopt due to “cost” and “emotional” factors. <https://www.cff.org/managing-cf/adoption-and-cf>

Stance on LGBTQ+

<https://www.cff.org/community-posts/2020-05/being-transgender-and-non-binary-cf-world>

- Article in 2020 promoting transgender and non-binary ideology from a woman (identifying as a “they”) who has CF.
