ABORTION

- Published a [press release](#) opposing the overturning of Roe v. Wade:

*"The recent U.S. Supreme Court decision to overturn Roe v. Wade will have deep implications for hundreds of thousands of women and pregnant people—particularly people of color and people with low income—as well as children and families. The data clearly demonstrates these individuals and families will be significantly more likely to remain in poverty or fall below the poverty line. It stands to reason then that **the ruling will stretch already limited budgets, in the middle of historic inflationary pressures, resulting in more economic hardship** and increased reliance on federal nutrition safety net programs, which will not be enough to cover the costs of food for those in need.*

- Feeding America's current chief government relations officer, [Vince Hall](#), worked for 7 years as the VP of Public Affairs and Communications at Planned Parenthood.
