

February 11, 2025

Dear President Trump,

On behalf of my organization, [American Life League](https://www.all.org), thank you for your speedy actions to protect American citizens from dangerous drug cartels. These cartels prey on our young people and take more lives than we know. I am writing to you today to alert you about a lesser-known drug cartel that targets our country and illegally preys on America's women. I believe this cartel deserves the same terrorist classification as those marketing fentanyl.

Our most recent report, [Exposing the Abortion Pill Drug Cartel](https://all.org/pill-report) (<https://all.org/pill-report>), was released in September 2024, and it exposed the underbelly of the abortion industry in our country. We revealed the hidden networks of abortion providers and volunteers who work as drug dealers via the Internet and illegally traffic abortion-inducing drugs via the United States Postal Service.

These secret abortion networks, some operating out of Mexico, unlawfully prescribe abortion pills to women over email, encourage women to hide their medical information, and teach them how to lie to medical personnel should they end up in the emergency room after complications from their self-administration of these dangerous, illicitly obtained drugs.

These secret drug trafficking networks intentionally and covertly distribute these drugs into states where lawmakers have enacted pro-life legislation. They are criminally employing the USPS to subvert the law.

In addition to the obvious circumvention of laws intended to protect women and children, these abortion drug cartels are distributing unregulated, unverified, and contraband products. As with other illegally distributed drugs, these "abortion pills" may be laced with foreign substances and chemicals and might not contain or bear any pharmaceutical resemblance to the product ordered by the unsuspecting customer. There is absolutely no way to verify that the goods shipped via third-party distributors from around the globe, without oversight and circumventing the protections established by the US Food and Drug Administration and Federal Trade Commission, are what they say they are.

This intentional evasion of protective regulations allows these illegal drug traffickers to perpetuate their abuse, as they can even supply a woman with drugs intended to kill her baby without her knowledge or consent.

The absence of any true medical element in the illicit process greatly multiplies the risk to the woman, who is buying illegal, unregulated, and untested drugs from a faceless dealer in a covert, criminal distribution network.

President Trump, I am asking you, in the wake of your Executive Order entitled "[Designating Cartels and Other Organizations as Foreign Terrorist Organizations and Specially Designated Global Terrorists](#)" (January 20, 2025) to please include the abortion pill drug cartel in the list of known cartels in America.

Your bold decision to label these cartels as terrorist organizations is one that will protect Americans and work to rid our country of the dangerous drugs that criminally flood across our border. In the same way, these abortion pill drug rings senselessly put women at unnecessary risk, and even worse, they take the lives of millions of preborn American citizens.

Thank you for your efforts to Make America Safe Again. We must protect our women and our children from the deadly grasp of the abortion pill drug cartel.

Thank you for your work, President Trump. May God bless you!
